

Abdulhafiz Nasir

"Playmaker" — Computer Software Engineering Student

Nigeria | hello@playmaker.dev | github.com/playmaker | linkedin.com/in/playmaker

Profile

Computer Software Engineering student (National Innovation Diploma, KSITM) and co-founder of CodeBreakers, a cybersecurity and programming education platform. Focused on frontend development, ethical hacking, and building shipped, real-world projects rather than tutorials alone.

Education

Katsina State Institute of Technology & Management (KSITM)

National Innovation Diploma — Computer Software Engineering | Reg: NID/CSE/24/0111

Skills

Frontend: HTML, CSS, JavaScript, Tailwind CSS, Responsive Design

Programming: Python, Java, Flutter (basics)

Tools: Git/GitHub, Linux, Kali Linux, VS Code, Android Dev Tools

Backend (learning): FastAPI, Supabase, SQLite

Other: Cybersecurity, Ethical Hacking, AI Development, Software Architecture

Selected Projects

CodeBreakers Academy — E-learning platform with coding playground, quizzes, and progress tracking (PWA).

SynapseOS — AI-powered cybersecurity analysis platform for incident and log review.

Playmaker Solver — Mathematics/calculus assistant web app with step-by-step solutions.

Prof Trader — Trading assistant platform with AI-based market analysis.

Murya Voice — Voice-driven IVR solution for local communities in Hausa and English.

Experience

SIWES Industrial Training — Vertenet Solution (affiliated with KATDICT): frontend web development and introductory networking, completed as part of a 10-student group placement.

Co-founder — CodeBreakers: building a platform to train developers and ethical hackers.
